* Available by Special Order. Disclaimer: CUTEK® COLOURTONES ARE NOT COMPATIBLE WITH AND MUST NOT BE MIXED INTO ANY THIRD-PARTY PRODUCT. Colourtones may look different when applied to your specific wood. To maintain your wood's natural colour for longer, choose a CUTEK® Colourtone similar to the natural colour of your wood. Suggested CUTEK® Colourtones that match the natural hue of your wood can be found on our website: www.cutekstain.com. CUTEK® Colourtones can also help alter your wood colour if required (e.g. make your wood look lighter or darker than its natural state). Order a Free CUTEK® Colourtone Sample Testpot from our website or your local stockist to test if your chosen Colourtone is right for your project.
