PREPARE AND PROTECT

STEP 1 ► PREPARE

Restore, strip and clean your wood.

CUTEK® WOOD REVIVER

Restore old, weathered or stained wood to look like new.

CUTEK® WOOD STRIPPER

Removes paint and surface coatings from wood.

CUTEK® QUICKCLEAN

Clean your wood for a maintenance recoat.

The CUTEK® wood protection system is designed to highlight the natural beauty of your wood.

To maximize your woods unique features, we have developed a two-step system that will:

- 1 ► enhance your raw wood by preparing it properly for coating, and then
- 2 ► protect its natural beauty and provide added dimensional stability for its future.

It is important to **PREPARE** your wood properly, so that you can powerfully **PROTECT** it.

STEP 2 ► PROTECT

Protect your wood in exterior settings.

EXTERIOR WOOD

Originally designed for and proven to work in the harshest of Australian environments.

CUTEK® EXTREME

High Performance penetrating oil/stabilizer that works from the inside out to control moisture, and minimize warping, cupping and splitting. Guaranteed never to peel or flake, CUTEK® Extreme extends the service life, and enhances the natural beauty of your wood.

CUTEK® COLORTONE

Color additive for CUTEK® Extreme.

Location: Stittsville, ON Photographer: J.Markov

CUTEK® WOOD REVIVER

CUTEK® Wood Reviver will clean and prepare old, grayed off or stained wood, getting it ready for initial applications of CUTEK® Extreme.

It is a powerful product that counteracts the weathering process by eliminating years of sun discoloration and silvering from all species of wood.

CUTEK® Wood Reviver brightens, cleans stubborn stains, removes gray and restores wood surfaces back to the appearance of new wood. It is also effective in removing stains caused by tannins, water, iron, resins, mold and fungus.

WHY CUTEK® WOOD REVIVER?

POWERFULLY RESTORES WOOD

Brings weathered, grayed/silvered wood back to original appearance

REMOVES STUBBORN STAINS

Such as iron stains, water marks, tannins, resins, mold and fungus

PREPARES NEW WOOD FOR COATING

Removes common invisible glaze ('mill glaze') from newly sawn wood or machined lumber

CUTEK® WOOD STRIPPER

CUTEK® Wood Stripper is a powerful and user-friendly paint and surface coating stripper.

It is the smart alternative to conventional strippers that use dangerous chemicals (such as methylene chloride, NMP, etc.).

CUTEK® Wood Stripper is suitable for removing multiple layers of the most commonly used wood coatings such as latex paints, stains, varnishes, linseed/natural oils, acrylics and other film forming coatings. It is also effective at removing coatings from metal, brick and masonry surfaces.

WHY CUTEK® WOOD STRIPPER?

POWERFUL WOOD STRIPPER

Removes old surface coatings from wood, metal, brick and masonry surfaces

SMART ALTERNATIVE

Does not use dangerous chemicals like Methylene Chloride and NMP

SAFE AND USER-FRIENDLY

Safe to use on your DIY project
(*no professional experience necessary*)
with soap and water clean up

CUTEK® QUICKCLEAN

CUTEK® Quickclean is the perfect way to regularly keep all your wood clean, and it prepares wood to optimize the performance of maintenance coats of CUTEK® Extreme.

It will easily remove dirt, grease, and grime as well as even out CUTEK® Colortone that has started to wear or erode unevenly on your wood.

CUTEK® Quickclean is a powerful general-purpose outdoor cleaner that removes dirt, grease and grime from all your exterior hard surfaces. CUTEK® Quickclean is a concentrate that should be diluted with water. The dilution will vary depending on the build-up of dirt/grease on the surface.

WHY CUTEK® QUICKCLEAN?

POWERFUL OUTDOOR CLEANER

General-purpose cleaner that removes dirt, grease and grime from outdoor surfaces

PERFECT FOR REGULAR WOOD CLEANING

Prepares wood for a maintenance coat of CUTEK® Extreme

CLEAN UP CUTEK® SPILLS WITH EASE

Easily cleans accidental spills of CUTEK® Extreme

CLEANS ALL HARD SURFACES

Including composite decking, plastic, PVC, tiles, pavers, concrete and glass

CUTEK® EXTREME

CUTEK® Extreme is a high-performance, oil-based wood stabilizer.

Penetrating deeply into wood, CUTEK® Extreme highlights the natural grain and beauty of wood while providing robust and long-lasting protection. Working from the inside out to control moisture, and minimize warping, cupping and splitting, CUTEK® Extreme improves the service life of your wood.

CUTEK® Extreme will not flake or peel and maintenance is fast and simple – no need to sand or strip.

CUTEK® Extreme celebrates the natural beauty, grain and texture of wood. Applied as a clear oil, CUTEK® Extreme will allow wood to naturally silver over time. Mixing in one of the many CUTEK® Colortones will help to enhance and maintain the freshly oiled natural look of your wood or alter your wood color to meet your design requirements.

WHY CUTEK® EXTREME?

STABILIZES YOUR WOOD

Significantly reducing splitting, warping and cupping.

SIMPLE AND EASY TO USE

No technical experience necessary.

MAINTENANCE IS FAST AND SIMPLE

No need to sand or strip, just simply clean and recoat.

NO FLAKING OR PEELING

Instead, the coating is designed to fade with time.

COST EFFECTIVE

Up to 2x the coverage rate of most wood coatings.

YOUR WOOD IS THE STAR!

Enhances the natural color and grain of your wood.

SUSTAINABLE CHOICE

Significantly extends the service life of wood.

LONG-TERM, CUMULATIVE PROTECTION

Stays active inside your wood to protect from the inside out.

CUTEK® CARES

We plant one tree for every can of CUTEK® Extreme sold worldwide.

WHY CHOOSE CUTEK® EXTREME?

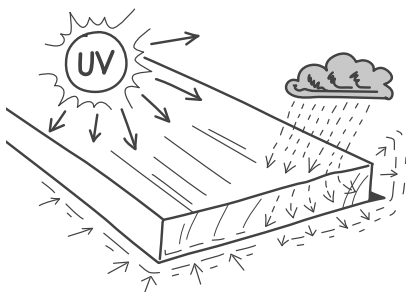

There's nothing like beautiful wood.
Make yours last with CUTEK® Extreme.

Water is the enemy of wood, unlike other oils and coatings, CUTEK® Extreme diffuses deeply into the wood to repel moisture and help maintain its structural integrity.

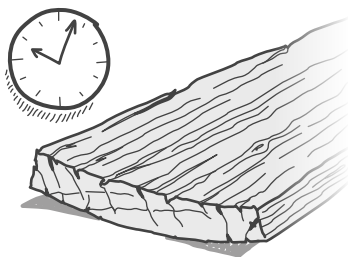

The Effect of Moisture on Wood...

In damp or rainy conditions, moisture gets into the wood causing swelling. When the wood dries, it shrinks.

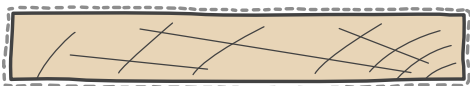

With every wet and dry cycle this process is repeated.

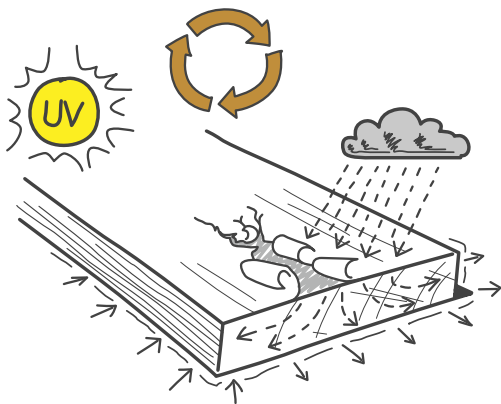

Over time this causes the wood to crack, split, warp and rot.

Traditional coatings sit on the surface of the wood. UV rays will break down this coating causing it to peel.

This allows water to get into the wood and the whole cycle of shrinking and swelling starts again. You are left with costly, time consuming maintenance to sand and strip the old coating away and reapply.

HOW IT
WORKS
VIDEO

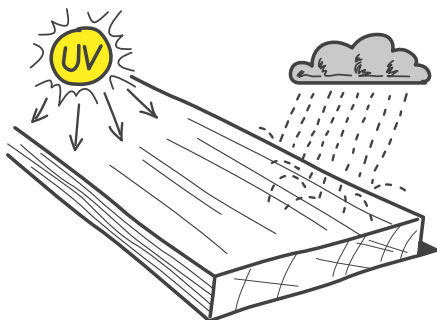

WHY CHOOSE CUTEK® EXTREME?

THE CUTEK® SOLUTION

CUTEK® Extreme is different as it diffuses deeply into the wood which soaks it up like a sponge.

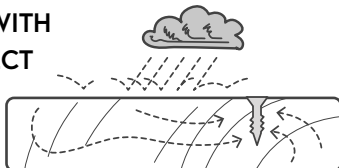

CUTEK® Extreme protects your wood from the inside out by actively displacing water throughout the wood and providing unsurpassed long-term protection against water damage.

TRUE PENETRATION WITH A SELF-HEALING EFFECT

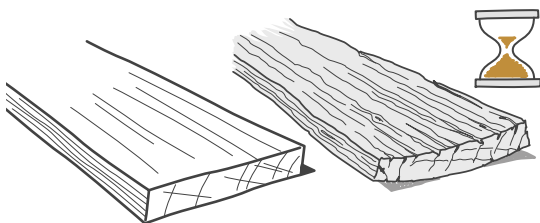

The protective components penetrate and stay permanently

mobile in the coated wood, migrating to any cut or perforation with a self-healing action.

PROTECTION AND DIMENSIONAL STABILITY

CUTEK® Extreme is cumulative, providing long life value, reducing cracking, splitting and warping of the wood. This extends the service life of your wood.

HIGHLIGHTS THE NATURAL BEAUTY OF WOOD

Choose CUTEK® Extreme clear oil for a natural light appearance that will gradually silver over time. Or use one of our CUTEK® Colortones to help retain the original color of your wood.

EASY MAINTENANCE

Protect your capital investment with easy, regular maintenance. It is easy to use, easy to maintain and beautiful to look at. This is Australian-made innovation at its best - experience the CUTEK® difference!

THE CUTEK® DIFFERENCE

THE CUTEK® DIFFERENCE

PROVEN TRACK RECORD

- 30-year track record across 5 continents.
- Unparalleled, proven mode of action with self-healing protection.
- Premium raw materials + technical knowledge.
- Primary focus of ensuring wood's longest service life.

MINIMAL MAINTENANCE

Many architects, builders and owners trust CUTEK® wood coatings for long-term asset protection, because they work with minimal maintenance problems.

Location: Manotick, ON Photographer: J. Markov

INDEPENDENTLY TESTED

CUTEK® Extreme has been independently tested and proven to offer powerful, long-term environmental protection and dimensional stability improvements that stand up to the most extreme conditions.

KNOWLEDGEABLE STAFF

We employ experts from the wood industry as our sales representatives, with decades of hands-on experience in coating and using wood in real-world building situations. Others will attest, we KNOW what we are talking about.

THE CUTEK® DIFFERENCE

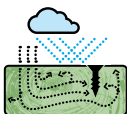

ENHANCE NATURAL GRAIN

CUTEK® Extreme will always enhance rather than obscure the natural grain and beauty of wood.

LOW COST LIFETIME

Maintenance is simple with CUTEK® products. It will never peel or flake, therefore no costly sanding or stripping required for maintenance.

TRUE PENETRATION WITH A SELF-HEALING EFFECT

- CUTEK® Extreme protects your wood from the inside out, actively displacing water throughout the wood and providing unsurpassed long-term protection against water damage.
- More protective components penetrate and stay permanently mobile in the coated wood, migrating to any cut or perforation with a self-healing action.

Location: Oro-Medonte, ON Photographer: J. Markov

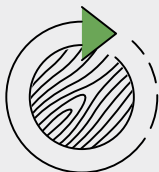

ORIGINALLY DEVELOPED FOR HARSH AUSTRALIAN CONDITIONS

Tried and tested in some of the harshest environments in the world - CUTEK® Extreme was originally developed to protect wood in extreme weather cycles and high UV ratings.

MAXIMIZING THE SERVICE LIFE OF YOUR WOOD

CUTEK® Extreme dramatically increases the dimensional stability of your wood. This, in turn, increases the service life of your project. *It's a simple equation:*

Extension of
the service life
of wood

=

Less cost to replace warped,
cupped and split boards
(and less trees cut down to
serve as their replacement)

Note: These colors are an indication only. Color may vary depending on many factors including application and the condition and species of wood.

UNDERSTANDING CUTEK® COLORTONES

Clear CUTEK® Extreme will quickly lighten/silver/gray with exposure to sunlight. Unless you want a clear finish that will naturally lighten/silver/gray off, it is important to mix a CUTEK® Colortone in to your oil before use.

Adding a CUTEK® Colortone will provide UV color protection and slows the lightening/silvering process.

(**NOTE:** CUTEK® Extreme diffuses deeply into your wood and will continue to provide moisture protection and improve dimensional stability even if a CUTEK® Colortone is not added and your wood becomes weathered and grayed.)

CUTEK® Tip:
Always use a Pre-Mixed Sample
to test if your chosen Colortone
is right for your project.

CUTEKSTAIN.COM

CUTEK® COLORTONES

CHOOSING THE RIGHT CUTEK® COLORTONE

To maintain your wood's natural color for longer, choose a CUTEK® Colortone similar to the natural color of your wood. Suggested CUTEK® Colortones that match the natural hue of your wood are listed in the chart to the right.

Colortones can also help alter your wood color if required (e.g. make your wood look lighter or darker than its natural state).

Always obtain a Pre-Mixed Sample to check your color choice before proceeding with your project.

COMMON WOOD TRENDS

Hamptons/ White Wash Look	White Wash*, Blue Slate*
Instant Weathered Look	Smokey Gray, Gray Mist*
Charred Wood Look	Black Ash

* Available by special order

COMMON WOOD TYPES IN THE USA

Douglas Fir - Rough	Honeycomb, Espresso
Douglas Fir - Smooth	Espresso, Ashwood*
Eastern White Cedar	Goldtone, Honeycomb
European Pine	White Wash*, Honeycomb
Ipe	Autumntone, Goldtone, Walnut
Kebony	Cedartone, Rustic Gold, Honeycomb
Mahogany	Rustic Gold, Honeycomb, Goldtone, Terra Cotta
Pressure Treated – Southern Yellow Pine	Honeycomb, Smokey Gray
Pressure Treated (Brown)	Espresso, Honeycomb
Redwood	Terra Cotta, Honeycomb, Espresso, Autumntone
Thermally Modified Ash	Walnut, Espresso
Thermally Modified Scots Pine	Honeycomb, Goldtone, Espresso
Thermally Modified Southern Yellow Pine	Ashwood*, Espresso, Honeycomb
Western Red Cedar – Clear & Knotty	Rustic Gold, Honeycomb, Goldtone, Cedartone

ONE TREE PLANTED AND SUSTAINABILITY PRACTICES

At CUTEK®, we are all about the wood. We love the look of wood, the feel of wood, and we want to provide the best wood protection solutions in the market.

We are also very passionate about the sustainability of the lumber industry. We recognize that without wood, there would be no need for wood oils.

CUTEK® is a company that has been passed down through generations, and we want to ensure that the lumber industry will continue to thrive and flourish for future generations to come.

For these reasons, we have chosen to take decisive action:

We have partnered with ONE TREE PLANTED and are committed to plant **1 tree** for **every can of CUTEK® oil** sold around the world. To find out more visit onetreeplanted.org

Our CUTEK® sponsored trees are planted wherever the can was sold, all around the world. For example:

1 CAN
SOLD IN
THE USA

=

1 TREE

1 CAN
SOLD IN
AUSTRALIA

=

1 TREE
PLANTED IN
AUSTRALIA

This is our promise and commitment to you.

We continually go above and beyond to source sustainable raw materials in our efforts to create high performance and environmentally responsible coatings **THAT WORK**

and

We have always been, and always will be, champions for the ecological use and long-term protection of wood, the most natural resource in the building industry.
