PREPARE AND PROTECT

STEP 1 ► PREPARE

Strip, clean and restore your timber.

CUTEK® RESTORE

Restore old, weathered or stained timber to look like new

CUTEK® WOOD STRIPPER

Removes paint and surface coatings from timber

CUTEK® QUICKCLEAN

Clean your timber for a maintenance recoat

The CUTEK® timber protection system is designed to highlight the natural beauty of your timber.

To maximise your timber's unique features, we have developed a two-step system that will:

- 1 ► enhance your raw timber by preparing it properly for coating, and then
- 2 ► protect its natural beauty and provide added dimensional stability for its future.

It is important to **PREPARE** your timber properly, so that you can powerfully **PROTECT** it.

Want to plan for your specific project? Try our project planner.

STEP 2 ► PROTECT

Protect your timber in Exterior and Interior settings

EXTERIOR TIMBER OILS

Designed for and proven to work in the harshest of Australian environments

CUTEK® EXTREME CD50

High Performance penetrating oil/stabiliser that works from the inside out to control moisture, and minimise warping, cupping and splitting. CUTEK® Extreme CD50 improves the service life, and enhances the natural beauty of your timber.

CUTEK® WOOD PRESERVATIVE

Oil based wood stabiliser used for the pre-treatment and remedial treatment of exterior wood in industrial and domestic situations. CUTEK® Wood Preservative coated wood resists damage caused by fungal decay, mould, termites and moisture, improving dimensional stability and minimised warping, cupping and splitting.

APVMA Approval No: 83026/107340

CUTEK® COLOURTONE

Colour additive for CUTEK® Extreme CD50 or CUTEK® Wood Preservative

INTERIOR TIMBER

Keep your interior timber clean and protected

CUTEK® INTERIOR

Interior Ultra-Matt Polyurethane which protects timber invisibly. Retain the natural look and feel of uncoated timber.

CUTEK® RESTORE

CUTEK® Restore will clean and prepare old, greyed off or stained wood, getting it ready for initial applications of CUTEK® Extreme CD50.

It is a powerful product that counteracts the weathering process by eliminating years of sun discoloration and silvering from all species of wood.

CUTEK® Restore brightens, cleans stubborn stains, removes grey and restores wood surfaces back to the appearance of new wood. It is also effective in removing stains caused by tannins, water, iron, resins, mold and fungus.

WHY CUTEK® RESTORE?

POWERFULLY RESTORES TIMBER

Brings weathered, greyed/silvered wood back to original appearance

REMOVES STUBBORN STAINS

Such as iron stains, water marks, tannins, resins, mould and fungus

PREPARES NEW TIMBER FOR COATING

Removes common invisible glaze ('mill glaze') from newly sawn timber or machined timber

CUTEK® WOOD STRIPPER

CUTEK® Wood Stripper is a powerful and user-friendly paint and surface coating stripper.

It is the smart alternative to conventional strippers that use dangerous chemicals (such as methylene chloride, NMP, etc.).

CUTEK® Wood Stripper is suitable for removing multiple layers of the most commonly used wood coatings such as latex paints, stains, varnishes, linseed/natural oils, acrylics and other film forming coatings. It is also effective at removing coatings from metal, brick and masonry surfaces.

WHY CUTEK® WOOD STRIPPER?

POWERFUL WOOD STRIPPER

Removes old surface coatings from timber, metal, brick and masonry surfaces

SMART ALTERNATIVE

Does not use dangerous chemicals like Methylene Chloride and NMP

SAFE AND USER-FRIENDLY

Safe to use on your DIY project, no professional experience necessary

CUTEK® QUICKCLEAN

CUTEK® Quickclean is the perfect way to regularly keep all your wood clean, and it prepares wood to optimize the performance of maintenance coats of CUTEK® Extreme CD50.

It will easily remove dirt, grease, and grime as well as even out CUTEK® Colourtone that has started to wear or erode unevenly on your wood.

CUTEK® Quickclean is a powerful general-purpose outdoor cleaner that removes dirt grease and grime from all your exterior hard surfaces. CUTEK® Quickclean is a concentrate that should be diluted with water. The dilution will vary depending on the build-up of dirt/grease on the surface.

WHY CUTEK® QUICKCLEAN?

POWERFUL OUTDOOR CLEANER

General-purpose cleaner that removes dirt, grease and grime from outdoor surfaces

PERFECT FOR REGULAR TIMBER CLEANING

Prepares timber for a maintenance coat of CUTEK® Extreme CD50 or CUTEK® Wood Preservative

CLEAN UP CUTEK® SPILLS WITH EASE

Easily cleans accidental spills of CUTEK® oils

CLEANS ALL HARD SURFACES

Including composite decking, plastic, PVC, tiles, pavers, concrete and glass

WHY CHOOSE CUTEK® OILS?

With new product always entering the market, and different claims often made, it is important to remember what CUTEK® is about.

It is important for you to know "What CUTEK is" and "what it does", unlike any other:

PROVEN TRACK RECORD

- 30-year track record across 5 continents.
- Unparalleled, proven mode of action with self healing protection.
- Premium raw materials + technical knowledge.
- Primary focus of ensuring timber's longest service life.

MINIMAL MAINTENANCE

Many architects, builders and owners trust CUTEK® wood coatings for long term asset protection, because they work with minimal maintenance problems.

INDEPENDENTLY TESTED

CUTEK® timber oils are independently tested and proven to offer powerful, long term environmental protection and dimensional stability improvements that stand up to the most extreme conditions.

KNOWLEDGEABLE STAFF

We employ experts from the timber industry as our sales representatives, with decades of hands-on experience in coating and using timber in real world building situations. Others will attest, we KNOW what we are talking about.

Proud Innovators, Not Imitators

WHY CHOOSE CUTEK® OILS?

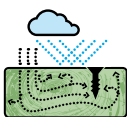

ENHANCE NATURAL GRAIN

CUTEK® oils always enhance rather than obscure the natural grain and beauty of wood.

LOW COST LIFETIME

Maintenance is simple with CUTEK® products. No costly sanding or stripping.

TRUE PENETRATION WITH A SELF-HEALING EFFECT

- CUTEK® protects your timber from the inside out actively displacing water throughout the wood and providing unsurpassed long-term protection against water damage.
- More protective components penetrate and stay permanently mobile in the coated timber, migrating to any cut or perforation with a self-healing action.

AUSTRALIAN OWNED & MADE

- A local business supporting other local businesses and our communities.
- Made in Queensland providing local jobs
- Australian manufacturer since 2001.

**CUTEK®
EXTREME CD50**

CUTEK® EXTREME CD50 HAS LOWER VOC'S THAN MOST OTHER OIL-BASED PRODUCTS

- Lower VOC CUTEK® Extreme CD50 gives exceptionally high spreading rates without compromising product efficacy.
- More product stays in the wood without evaporating to the atmosphere, meaning CUTEK® is much better value for money.

**OTHER
COMMON
PRODUCTS**

Coatings that are not **PERMANENTLY** mobile inside the wood and do not exhibit the self-healing effect **ARE NOT** the same as CUTEK® no matter what is claimed. Our first priority is always to extend and maximise the service life of timber **NOT** steer you into the ecosystem of our other products.

DON'T COMPARE APPLES TO ORANGES – THERE'S A BIG DIFFERENCE.

LONG-TERM PROTECTION AND DIMENSIONAL STABILITY

CUTEK® OILS	OTHER 'PENETRATING' OILS
<p>Proven, independently tested low leach formulas that go hard on top and remain mobile inside timber with a self-healing effect if timber is later cut or perforated by fasteners.</p> <p>This gives exceptional long term dimensional stability and protection of expensive timbers by minimising warping cupping and splitting.</p>	<p>Others claim to be "penetrating oils" but will actually contain drying oils/resins and evaporating solvents which form a traditional varnish/film type encapsulation coating once the VOC solvents in the formula have evaporated. Once this surface type coating is degraded by weathering, cutting or fastener perforation, water may freely enter the timber leading to significant cupping and splitting.</p>

VOC

CUTEK® OILS	OTHER 'PENETRATING' OILS
<p>CUTEK® Extreme CD50 has significantly lower VOCs than most oil-based coatings in class (typically 20-30%) meaning more protective components penetrate and STAY permanently in the coated timber.</p> <p>Significantly more value for money.</p>	<p>Usually high VOC (typically >50%). Large amount of purchased product is lost to the environment.</p> <p>A cheaper, high VOC coating may become more expensive when the amount of product that actually remains active in the coated wood is calculated.</p> <p>Significantly less value for money.</p>

WEATHERING IN THE ENVIRONMENT

CUTEK® OILS

Powerful protection, even in the most extreme environments.

Developed and proven in Australia for the harshest of Australian conditions.

CUTEK® Wood Preservative coated wood resists damage caused by fungal decay, mould and termites. It also protects exterior woods from moisture, improving dimensional stability and minimising warping, cupping and splitting.

OTHER 'PENETRATING' OILS

Other "penetrating"/natural oils may develop unsightly mould and fungal growth on the coated surface and underneath subsequently applied coatings. This situation can be difficult and costly to fix.

PRICE

CUTEK® OILS

Good value when dimensional stability, timber longevity and VOC is considered

OTHER 'PENETRATING' OILS

Could be more expensive over the long term

**Don't be fooled by competitor claims.
Choose CUTEK® with confidence.**

CUTEK® EXTREME CD50

CUTEK® Extreme CD50 is a high-performance, oil-based wood stabiliser.

Penetrating deeply into wood, CUTEK® Extreme CD50 highlights the natural grain and beauty of wood while providing robust and long-lasting protection. Working from the inside out to control moisture, and minimise warping, cupping and splitting, CUTEK® Extreme CD50 improves the service life of your wood.

CUTEK® Extreme CD50 will not flake or peel and maintenance is fast and simple – no need to sand or strip.

CUTEK® Extreme CD50 celebrates the natural beauty, grain and texture of wood. Applied as a clear oil, CUTEK Extreme CD50 will allow wood to naturally silver over time. Mixing in one of the many CUTEK® Colourtones will help to enhance and maintain the freshly oiled natural look of your wood or alter your wood colour to meet your design requirements.

WHY CUTEK® EXTREME CD50?

STABILISES YOUR WOOD

Significantly reducing splitting, warping and cupping

SIMPLE AND EASY TO USE

No technical experience necessary

MAINTENANCE IS FAST AND SIMPLE

No need to sand or strip, just simply clean and recoat

NO FLAKING OR PEELING

Instead, the coating is designed to fade with time

COST EFFECTIVE

Up to 2x the coverage rate of most wood coatings

YOUR TIMBER IS THE STAR!

Enhances the natural colour and grain of your timber

SUSTAINABLE CHOICE

Significantly extends the service life of timber

LONG-TERM, ACCUMULATIVE PROTECTION

Stays active inside your timber to protect from the inside out

CUTEK® CARES

We plant one tree for every can of CUTEK® Extreme CD50 sold.

UNDERSTANDING CUTEK® COLOURTONES

Un-tinted CUTEK® Extreme CD50 or CUTEK Wood Preservative® will quickly lighten/silver/grey with exposure to sunlight. Unless you want a clear finish that will naturally lighten/silver/grey off in a few months, it is important to mix CUTEK® Colourtones to your oil before use.

Adding CUTEK® Colourtones will provide UV colour protection and slows the lightening/silvering process.

(**NOTE:** CUTEK® Extreme CD50 and CUTEK® Wood Preservative diffuse deeply into your timber and will continue to provide moisture protection and improve dimensional stability even if CUTEK® Colourtones are not added and your wood becomes weathered and greyed.)

Order a free CUTEK® Colourtone Sample Testpot from our website or your local stockist to test if your chosen Colourtone is right for your project.

CUTEK.COM.AU

CUTEK® COLOURTONES

CHOOSING THE RIGHT CUTEK® COLOURTONE

To maintain your timber's natural colour for longer, choose a CUTEK® Colourtone similar to the natural colour of your timber. Suggested CUTEK® Colourtones that match the natural hue of your timber can be found in our tables below. Colourtones can also help alter your timber colour if required (e.g. make your timber look lighter or darker than its natural state). Always obtain a free sample testpot to check your colour choice before proceeding with your project.

COMMON TIMBER TYPES IN AUSTRALIA

Black Butt	Goldtone, Honeycomb*, Light Oak, Rustic Gold
Blue Gum	Autumntone, Burnt Red
Brush Box	Sela Brown, New Bronzestone
Cypress	Goldtone, Honeycomb*, Rustic Gold
Ironbark	Burnt Red, Walnut
Jarra	Burnt Red, Walnut
Merbau	Autumntone, Burnt Red, Merbau*, Sela Brown
Mixed Hardwoods	New Bronzestone, Rustic Gold, Sela Brown
Pine	Goldtone, Honeycomb*, Light Oak

ONE TREE PLANTED AND SUSTAINABILITY PRACTICES

At CUTEK®, we are all about the timber. We love the look of timber, the feel of timber, and we want to provide the best timber solutions in the market.

We are also very passionate about the sustainability of the timber industry. We recognise that without timber, there would be no need for timber oils. CUTEK® is a company that has been passed down through generations, and we want to ensure that the timber industry will continue to thrive and flourish for future generations to come. So, we have decided to put our money where our mouth is.

We have partnered with ONE TREE PLANTED and are committed to plant **1 tree** for **every can of CUTEK® oil** sold around the world. To find out more visit onetreeplanted.org

Our trees are planted where the can was sold, all around the world. For example:

1 CAN
SOLD IN
AUSTRALIA

=

1 TREE
PLANTED IN
AUSTRALIA

1 CAN
SOLD IN
USA

=

1 TREE
PLANTED IN
USA

This is our promise and commitment to you.

We continually go above and beyond to source sustainable raw materials in our efforts to create high performance and environmentally responsible coatings **THAT WORK**

and

we have always been, and always will be, champions for the ecological use and long-term protection of timber, the most natural resource in the building industry.

CUTEK® INTERIOR

CUTEK® Interior is a water-based, ultra-matt interior polyurethane coating.

The ultra-matt finish resists polishing effect and keeps the natural look of uncoated timber. It is an environmentally friendly, low odour and low VOC formulation that uses advanced recycling technologies. Whilst primarily for interior use, it can also be coated on exterior surfaces completely protected from UV and rain. Typically it is used on wooden doors, cladding and panelling, ceilings, beams, interior window joinery and furniture.

WHY CUTEK® INTERIOR?

ULTRA-MATT FINISH

Resists polishing effect

KEEP THE NATURAL LOOK

Almost invisible protective coating that keeps the look and feel of uncoated timber

ENVIRONMENTALLY RESPONSIBLE FORMULATION

Water-based formulation that uses advanced renewable materials

SAFE AND USER-FRIENDLY

Low VOC and low odour

LONG-TERM PROTECTION

Highly durable polyurethane coating

FAST DRY

Short time between coats

EASY TO USE

Professional finish for beginners
